OPEN THE GATE TO THE WORLD

The most flexible and multipurpose Stage Box equipped with exceptional audio quality modules is now On Stage . . .

Just plug ARC (Audio Rack Controller) into an InnovaSON Stage Box and you get **Dio Core**

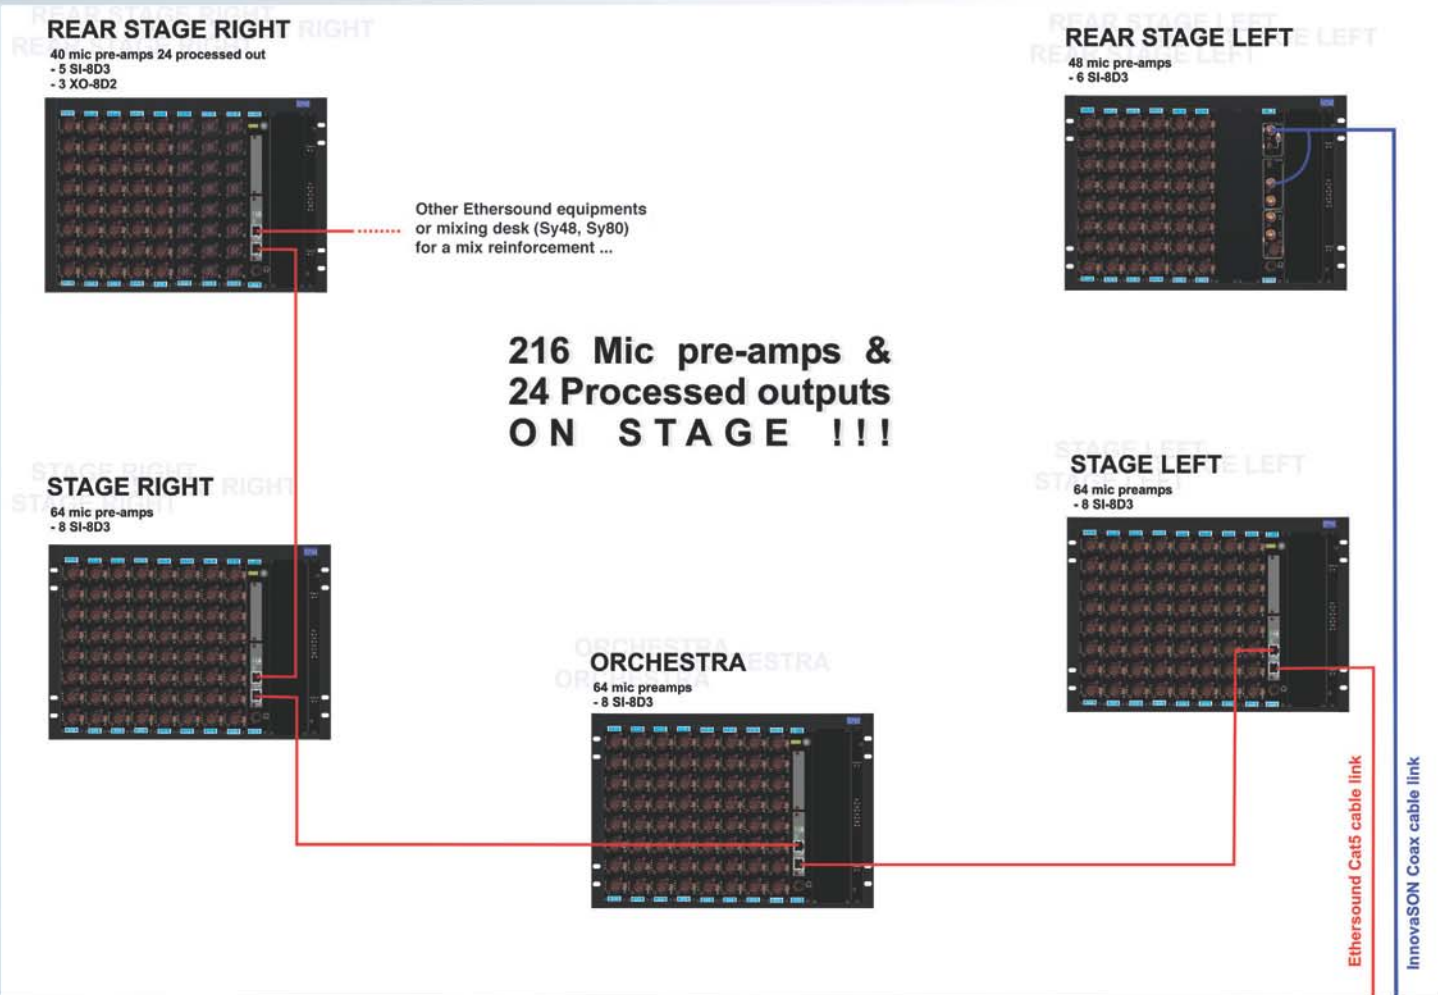

The most easily networkable Stage Box in the world

One more time

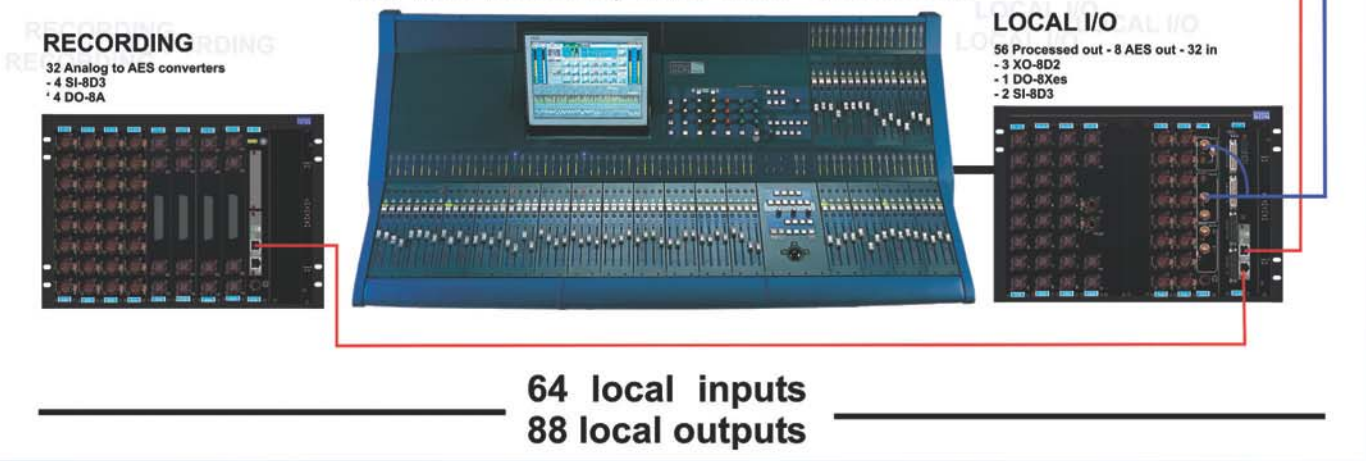

innovates . . .

Example of Broadway typical application

Sy80

104 inputs mixed at the same time
50 mix busses, with free allocation

- ARC is the new Audio Rack Controller equipped with two Dio locations for a full digital transmission. ARC replace the SC-64 or SC-Optical card in any Innovason Stage Box and convert it to a Dio Core rack.
- Thanks to Dio and the first Dio ES module, it has never been so easy to network the I/O resources.
- Ethersound allows a connectivity to the recording and mixing softwares through the Digigram interfaces and ADAT devices through the NetCIRA interface, inter alia...
- Each Dio Core provides 8 slots for a total of 64 I/O according to your needs.
